

INTEGRAL SENIOR LIVING

WE CAN help at "Community" Senior Living & Memory Care

WE CAN delegate insulin

Our certified nursing assistants (CNAs) have completed a nurse delegation course and a diabetic education course in order to properly delegate insulin.

WE CAN assist with catheters

Our care partners are able to maintain cleanliness around the insertion site and help manage catheter bags. Each of our residents with a catheter is partnered with a certified home health nurse for routine catheter maintenance. We also arrange immediate transportation to a hospital should the need arise for one of our residents.

WE CAN do two-person transfers

If a resident requires a two-person assist for a short period of time related to an acute illness or reversible factor.

WE CAN do Hoyer lifts

Yes, we do accommodate Hoyer lifts, provided after a safety evaluation with the resident they are utilized and managed by home health or hospice professionals.

WE CAN accommodate gluten-free diets

While our kitchen is not entirely gluten-free, we do adjust to the dietary needs of gluten-free residents as we do for all of our residents.
