an enhanced culinary experience

PURE DINING

FRESH INGREDIENTS. ELEGANT PRESENTATION. BITE-SIZE FOR EASE.

PURE Dining provides residents with a program that promotes dining with independence, dignity and accessibility without compromising their nutritional needs.

WHAT IS PURE DINING?

PURE is a technique used by our culinary staff to help support the independence of our Generations Memory Care residents. The PURE technique uses cooked and fresh proteins, vegetables and carbohydrates, ground into a base for each entrée. This technique allows them to prepare meals with bite-size food that residents can easily eat. Our chefs are highly trained and knowledgeable about the nutritional needs of our residents, and they elegantly prepare finger foods to meet these needs.

HOW IS PURE DIFFERENT?

Our culinary staff helps to ensure that not only can our residents eat the food in front of them, but their food looks visually appealing. They recreate traditional fork-and-knife meals in a unique way that gives our residents the opportunity to retain their independence.

HOW CAN PURE BENEFIT MY LOVED ONE?

If your loved one is experiencing symptoms of Parkinson's, dementia or various forms of arthritis or has been affected by a stroke, this program is designed with them in mind. Items are prepared in bite-size offerings, which eliminates the need for utensils and helps your loved one stay independent and dignified.
